

ITEC2024

OUR HISTORY

ITEC has over a decade of connecting R&D teams to address the challenges in the electrified transportation industry.

OUR VISION

To foster connections between academia and industry in the electrified transportation industry.

OUR MISSION

To fill the networking gap in industry from components to system level design.

June 19-21, 2024

ABOUT US

Our founders noticed that there was a gap in the marketplace for events that connected electric machines and electrified transportation teams across industries. They began ITEC in 2012 to connect the vehicle, aerospace, heavy duty, water and logistics R&D teams.

WHY EXHIBIT WITH US?

Our event draws R&D teams from labs across the world. Come exhibit to showcase your latest breakthrough and how it will impact the research process.

Connect

Bring your team to network with researchers in the transportation industry.

Showcase

Showcase your testing software, components and systems for electric machines and transportation applications.

Learn

Our presenters are leaders in their fields. The content is vetted to be technical and relevant.

ITEC2024

WHY SHOULD YOU EXHIBIT?

Let's find out!

Attendance History

*2020-2021 Virtual Due to Covid-19

*2022 ITEC+EATS co-located conferences

ATTENDANCE DATA

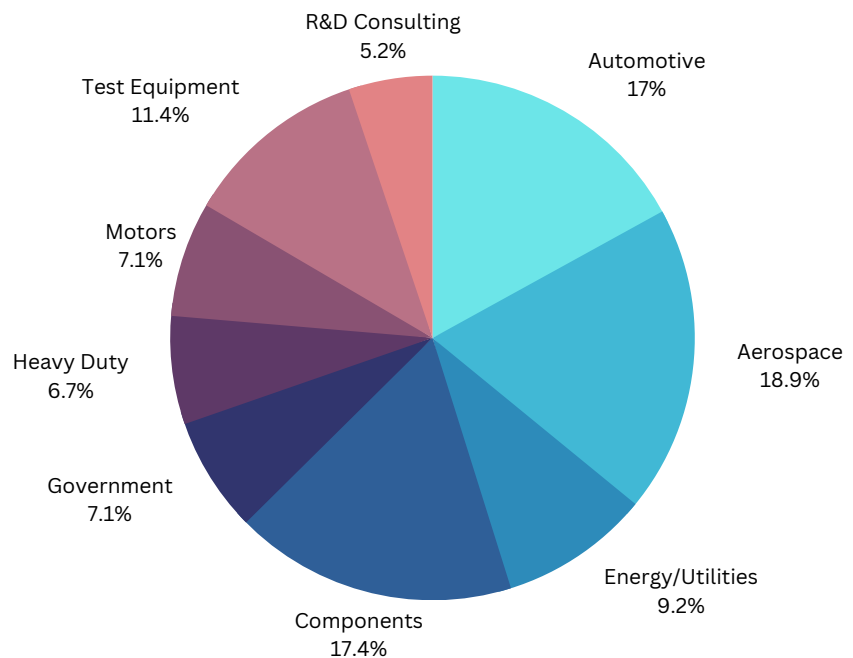

Exhibit at ITEC if You:

- Market to electric motor manufacturers
- Want to increase your network in the Electric Motor and Electrified Transportation Sector
- Produce batteries, packaging or testing equipment.
- Want to showcase your research to fellow R&D teams.
- Are looking to hire highly skilled students (Masters level and higher) in the electric vehicle space.
